⏳ Brainstorm planning

Goals of the brainstorm	Finding the best way to facilitate the process of buying and selling and placing orders and quickly receiving inventory from the warehouse
Brainstorming method	☑ **Creative matrix**- quickly generate ideas to address a wide range of people and situations ☐ **Silent circuit**- run a brainstorm that is inclusive of different learning styles and personality types ☑ **Round robin**- get a fresh perspective on an old problem ☑ **Idea prioritization**- visualize and align on which ideas you should pursue first
Participant instructions	1. Not having a negative attitude towards ideas 2. Examining the results in the executive team 3. Brainstorming for optimal management is done in groups and individually 4. Any idea generated belongs to the group, not the individual who thought of it 5. The time of brainstorming sessions varies between 1 and 1.5 hours 6. After the end of each session, the refining process is carried out based on predetermined criteria and a list of results is obtained.

🌱 Brainstorm pre-work

- ☑ Examining the advantages and disadvantages of the current system
- ☐ Go to Amazon
- ☑ Checking customer satisfaction
- ☑ Getting new ideas in the speech of Dr. Mohammad Reza Shearbaf

🕐 Brainstorm agenda

Item	Time
Review goals and agends	15 minutes
Providing different solutions	1 houre
Choosing the right solutions	10 minutes
Examining the advantages and disadvantages of work methods	2 hours for each

🎯 Brainstorm outcomes

Development ways to implement this system include full coding and the use of low-code platforms, each of which has its own advantages and disadvantages.

Summary of results

Among the proposed ways, it has cost-effective low-code platforms and also faster development than other ways.

Decisions

🌱 For this project, the project management team suggests that the desired system be implemented using low-code platforms
